Question

- What are the details on V-FLEX licensing for ThinManager?
- What are the ThinManager Catalog Numbers for licenses / activations?

Answer

ThinManager V-FLEX licensing has replaced the 5-pack model licensing. ThinManager will continue to be available in either FactoryTalk Activation (FTA) or traditional ThinManager Activation (TMA). Here is a breakdown of the ThinManager catalog numbers, showing the 5-pack model catalog numbers that is End of Life as of Aug 26, 2019 and the replacement V-FLEX catalog numbers:

* 9541-TMFRP catalog number is now moved into a bundle called by 9541M-TMUT11. The activation file remains the same and the 9541-TMFRP catalog number is still the redundancy companion license

Note: The actual FactoryTalk Activations sometimes are fulfilled with a different catalog number than what is listed here. 9541M-TMFT11 equates to 9541-TMF1-xxxx or 9541-TMFF1-xxxx and 9541M-TMUT11 equates to 9541-TMFRx or 9541-TMFFRx. Redundant part numbers usually have an R in the middle term of the part number.
