

Process Safety

Safety Assessments • SIL 1, 2 and 3 Process Safety Systems

Rockwell Automation, Inc. (NYSE:ROK), the world's largest company dedicated to industrial automation, makes its customers more productive and the world more sustainable. Throughout the world, our flagship Allen-Bradley® and Rockwell Software® product brands are recognized for innovation and excellence.

Safety, Compliance, and Productivity

Rockwell Automation has a well-deserved reputation for helping you improve productivity and quality. We're also the world's largest safety system provider.

Rockwell Automation is the industry leader in safety & compliance, helping reduce injuries and costs while improving productivity throughout your site. Our expertise, experience, and products have established us as the world leader in industrial safety technology, enhancing your business performance with functional safety solutions.

Best-in-Class Safety & Productivity

Two recent Aberdeen Group studies have shown that safety and productivity go hand in hand. These studies identified three key elements separating best-in-class plants from average performers:

- The safety culture,
- management strategy, Use of technologies that significantly improve both

you assess your plants and determine a path to best-in-class safety and productivity.

Reduce Time to Design, Develop, and **Deliver Safety Solutions**

Rockwell Automation can help improve your performance through formalized risk management practices and technologies to identify and mitigate machine, process, and electrical safety hazards. We provide the industry's most complete offering of safety services and products, and a suite of tools to help accelerate safety system development and ensure compliance.

Functional Safety

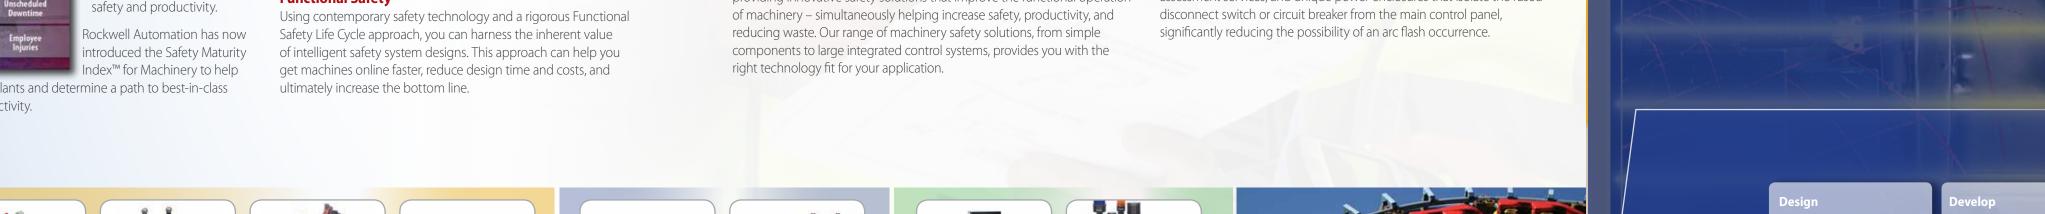

Plantwide Safety

Ensure Compliance. Take advantage of current standards that improve risk mitigation and provide for the use of newer safety technologies – technologies that help reduce nuisance shutdowns, prolonged restarts, and operational costs. Rockwell Automation can help you improve compliance with a comprehensive range of assessment services spanning your entire production process from electrical/arc flash, to process, to machinery.

Machinery Safety. Rockwell Automation takes a holistic approach to safety, providing innovative safety solutions that improve the functional operation of machinery – simultaneously helping increase safety, productivity, and reducing waste. Our range of machinery safety solutions, from simple components to large integrated control systems, provides you with the

Process Safety. Rockwell Automation has over 40 years of experience in providing process safety solutions and services. Our range of process safety offerings provides scalable solutions to satisfy cost, safety integrity level (SIL 1, 2 and 3), performance, and availability requirements including ESD, F&G, Turbine and Compressor, HIPPS, Combustion Control and CPC.

Electrical Safety. To protect workers, it's crucial not only to take measures designed to protect against arc flash incidents, but also to lower the risk of an occurrence taking place at all. Rockwell Automation provides arc flash assessment services, and unique power enclosures that isolate the fused disconnect switch or circuit breaker from the main control panel,
