LP-901 Lightning Protector

RadioLinX LP-901 Lightning Protector is designed to provide protection for 900MHz wireless systems with low RF power and excellent protection.

The LP-901 lightning protector is designed for use internal to an enclosure with the bulkhead fitting protruding the enclosure from the inside. The connectors are a standard N jack connector to a standard N jack BH connector. The bulkhead fitting can be connected to any standard N type connector extension cable.

Features and Benefits

- Multi-strike capability
- Fully weatherized housing
- Low throughput energy
- DC blocked

Technical Specifications

Frequency Range	800 - 2000 MHz
Insertion Loss	0.1 dB
RF Power	500-750 Watts
Temperature Operating/Storage	-40° C to +85° C (-40° F to 185° F)
Relative Humidity	0 to 100% condensing
Surge Throughput Energy	≤ 0.5000 µJ

Additional Products

ProSoft Technology® offers a full complement of hardware and software solutions for a wide variety of industrial communication platforms.
