

## 140MT MPCBs and MCPs

### [140MT-C3E-C29](#)

MPCB", Standard Magnetic Trip (Fixed at 14 x I<sub>e</sub>)", 24 - 29 A", Std. Performance""", Frame Size C"

### Product Details

| SYSTEM VOLTAGE DATA                              |                                                        |
|--------------------------------------------------|--------------------------------------------------------|
| Supply Voltage                                   | 480V 60Hz                                              |
| Maximum Available Fault Current (at the Breaker) | 0 kA                                                   |
| CIRCUIT BREAKER                                  |                                                        |
| Circuit Breaker Type                             | Motor Protection Circuit Breaker                       |
| Adj. Thermal Current Range (A)                   | 23 - 29A                                               |
| Frame Size                                       | Frame Size C                                           |
| Breaking Capacity                                | Standard Breaking Capacity                             |
| Application                                      | Standard Magnetic Trip (Fixed at 14 x I <sub>e</sub> ) |
| ASSEMBLY                                         |                                                        |
| Factory or User Assembled?                       | User Assembled                                         |
