

Bulletin 800S — Standard Duty Stations

Bulletin 800S standard duty push button stations are used in control circuits. They offer compact size and dependable performance.

NEMA Type 1 general purpose stations have been designed for greater operating flexibility and ease of wiring. The cover of the station contains the entire contact mechanism. Wiring terminals are located in the base. Spring type, silver plated contacts connect the two assemblies. This unique construction will speed up installation and maintenance. Operating buttons can be rotated 90° to make them suitable for horizontal mounting. This change can be made in the field.

NEMA Type 4 enclosures are die cast aluminum. Standard stations are supplied with a 3/4 in. pipe tap at the bottom.

Pilot Lights

- Push button stations with pilot lights can operate on either 120V or 240V by changing connections. A red pilot lens is supplied.

Selector Switches

- All two-position Bulletin 800S standard duty selector switch stations can be changed to three-position in the field, and the three-position selector switches can be changed to two-position. Instructions for changing are included with each station.
- In addition to the standard marking, all selector switches are supplied with adhesive backed metal legend plates, marked as follows: OFF-ON, FOR-REV, HAND-AUTO, OPEN-CLOSE, HIGH-LOW, SUMMER-WINTER, SUMMER-OFF-WINTER, HIGH-OFF-LOW, OPEN-OFF-CLOSE, FOR-OFF-REV, HAND-OFF-AUTO.
