# Circuit Protection Portfolio

**1489-M Circuit Breakers**  
Approved for branch circuit protection in the United States and Canada, and certified as Miniature Circuit Breakers for IEC applications.

**1492-SP Supplementary Protectors**  
Overcurrent protection for equipment where branch circuit protection is already provided, or is not required. Also Miniature Circuit Breakers as defined by IEC Standards.

**1492-D Circuit Breakers**  
Overcurrent and short circuit protection for higher voltage DC circuits. Also Miniature Circuit Breakers as defined by IEC Standards.

**188-J 10 kA Regional Circuit Breakers**  
Protective devices applied at the equipment level. Regional certifications only. Available for purchase in China and Europe.

**188-K 6 kA Regional Circuit Breakers**  
Protective devices applied at the equipment level. Regional certifications only. Available for purchase in China and Europe.

Rockwell Automation offers a wide range of Allen-Bradley circuit protection products designed for a variety of applications.

**1492-RCD  
Residual Current  
Devices**

By detecting small leakage currents and disconnecting all ungrounded connectors quickly, RCDs can prevent injury to exposed personnel and damage to equipment.

**1692 Electronic  
Circuit Protectors**

Protection for secondary circuits of 24V DC switched mode power supplies. These modules monitor both supply voltage and load currents, and can be monitored and controlled locally and remotely.

**1492-MC Circuit  
Breakers and Ground  
Fault Protectors**

Thermal magnetic circuit protection and sensing thresholds for personnel and equipment protection.

**1492-GH, -GS High-density  
Supplementary  
Protectors**

Thermal magnetic circuit breakers with a high density design useful when DIN Rail space is a premium.

**1492-FB Fuse Holders**

Designed for use in many OEM applications. Provides safe and convenient installation of Midget, Class CC, and Class J fuses.

# 1489-M Circuit Breakers

Bulletin 1489-M thermal-magnetic Circuit Breakers are approved for branch circuit protection in the United States and Canada, and are certified as Miniature Circuit Breakers for IEC applications.

These branch protectors are compatible with many accessories to meet diverse application needs, including UL 508 Listed bus bars for convenience in panel assembly, auxiliary contacts, signal contacts and shunt trips for versatility, and lockout attachments for safety during maintenance.

## Features

- Current limiting
- Fast breaking time
- High rated voltage
- Dual terminals provide a more secure connection of up to four wires, or two wires and a bus bar
- Superior shock and vibration resistance to help prevent nuisance tripping
- Terminal design helps prevent wiring misses by directing wires into the terminal openings, even while tightening
- Reversible line and load connections
- Single and multi-pole toggle mount lock out attachments available for Lockout/Tagout (LOTO)
- RoHS compliant and fully recyclable device
- Suitable for extreme ambient conditions

7	1.1	50	4.5
8	1.5	60	4.9
10	2.1	63	5.4
13	2.3	—	—

**Zero-stack Derating**

The installation of several miniature circuit breaker side by side with rated current on all poles requires a correction factor to the rated current (not required if spacers are used).

No. of Adjacent Devices	Factor
1	1
2,3	0.9
4,5	0.8
≥ 6	0.75

**Approximate Dimensions**

**Note:** Dimensions are shown in millimeters (inches). Dimensions are not intended for manufacturing purposes.

## Application Information

### Circuit Voltage

The Bulletin 1489-M circuit breakers are rated by voltage class. Applications should not exceed the listed voltage and current range.

### Circuit Frequency

The Bulletin 1489-M circuit breakers may be applied to frequencies of 50 Hz and 60 Hz without derating. For applications above 60 Hz, contact Rockwell Automation with specific application information for the derating of the circuit breakers.

### Available Short Circuit Current

The Bulletin 1489-M circuit breakers should only be applied in those applications in which the available short-circuit (or fault) current is less than or equal to 10 kA (US/Canada) and 15 kA (IEC).

### Tripping Characteristics

The trip curve characteristics are shown on the following pages. The trip bands shown for each breaker represent current tripping limits for a circuit breaker and are within the limits established by UL.

The standard tripping characteristic for Bulletin 1489-M is Type C. Type C has a magnetic trip activated at 5-10 times the rated current of the circuit breaker. The reference temperature for the thermal tripping characteristics is 30 °C. The Type C characteristic will suit most applications.

In rare occurrences when the Type C characteristic does not fully meet the application, Type D magnetic trip characteristic is available, allowing for transients approximately twice as high as the standard Type C.

For a specific current at 30 °C, a circuit breaker will open ("clear the circuit") automatically at some total time that will be within the minimum and maximum time shown on the curves. For example, a one-pole, 15 A, Bulletin 1489-M circuit breaker trips in not less than 1 s and not more than 200 s on a 30 A current. Because the UL standard defines this time spread, users should not specify exact tripping time. The lower current portion of the curves (upper left) depicts the time to trip due to thermal action and reflect overload protection of the wire and connect load. The higher current portion of the curves (lower right) depicts the trip due to magnetic action of the circuit breaker and reflects protection due to short circuit level currents.

### Application Considerations

*The following is a discussion of application considerations related to North American applications. When applying product to IEC regional requirements, follow IEC practices and guidelines.*

The selection of a specific ampere rating for a specific application is dependent on the type of load and duty cycle and is governed by the National Electrical Code (Canadian Electrical Code) and UL/CSA. In general, the codes require that overcurrent protection is at the current supply and at points where wire sizes are reduced. In addition, the codes state that conductors be protected according to their current carrying capacity. There are specific situations that require application consideration, such as motor circuit, and guidelines for the selection for transformer protection.

The Bulletin 1489-M circuit breakers are "non-100% rated" as defined by UL 489, para 7.1.4.2. As such, the circuit breaker's rating should be loaded to no more than 80% if used with continuous loads.

Line and load may be reversed. The Bulletin 1489-M circuit breaker may be bottom fed.

### Branch Circuits

Bulletin 1489-M circuit breakers may be used to protect branch circuits. A branch circuit is the wiring portion of a system extending beyond the final overcurrent device protecting the circuit. Guidelines established in NEC, CEC, UL, and CSA should be used to determine the specific device. For example:

#### Motor Branch Circuit

Bulletin 1489-M circuit breakers are not horsepower rated because they are able to safely interrupt currents far in excess of the locked rotor value for a selected motor. This ability is recognized in the codes and standards and is also established by the UL and CSA tests described in UL 489 and CSA C22.2 No. 5 standards.

The size of a Bulletin 1489-M circuit breaker should be determined following the guidelines for an Inverse Time Circuit Breaker.

*References: NEC 430.51 and UL 489. Also see CEC and appropriate Canadian Standards.*

#### Transformer Protection

Bulletin 1489-M circuit breakers may be used for transformer protection following the guidelines established.

*References: NEC 450 and UL 489. Also see CEC and appropriate Canadian Standards.*

Heater Load, Lighting, and Other Load Protection  
Bulletin 1489-M circuit breakers may be used for protection of heater loads, lighting loads, and other loads following the guidelines established.

*References: NEC Article 31 and UL 508A. Also see CEC and appropriate Canadian Standards.*

### SWD Rating

The Bulletin 1489-M breakers (0.5 ... 20 A) are rated as Switch Duty (SWD) and as such may be applied to switch fluorescent lighting loads up to their current and voltage maximum.

### Coordinated Overcurrent Protection

Where an orderly shutdown is required to minimize the hazards to personnel and equipment, a system of coordination based upon the faulted or overloaded circuit is isolated by selective operation of only the overcurrent protective device closest to the overcurrent condition. The user should select devices that meet this requirement.

*References: NEC 240.12. Also see CEC.*

### HACR Rating

Bulletin 1489-M Circuit Breakers are rated as Heating, Air Conditioning and Refrigeration circuit breakers as defined by UL 489, paragraph 6.7 and may be used in this type of application.

### Current Limiting

Bulletin 1489-M Circuit Breakers are rated as current limiting circuit breakers as defined by UL 489, paragraph 8.6.

The Bulletin 1489-M line features the ability to achieve short circuit interruptions far more effectively than conventional breakers. In conventional circuit breakers, the short circuit interruption time required is approximately one or two half cycles of an AC sine wave. When the contacts open, the resulting arc continues to burn until the current level passes through zero. The arc may re-ignite because of the insufficient width of the contact gap. The current that flows until the arc is extinguished produces a heating effect proportional to the  $I^2t$  value (let-through-energy) of the fault current.

The Bulletin 1489-M device is designed to substantially reduce the amount of let-through-current and the resulting let-through-energy that can damage protected components. The Bulletin 1489-M has the ability to interrupt short circuit current within the first half cycle of the fault. Limiting let-through current and energy will protect against the harmful effects of overcurrent and is focused primarily on avoiding excessive heat and mechanical damage.

Both of these factors are proportional to the square of the current. Thermal energy is proportional to the square of the RMS value and magnetic forces are proportional to the square of the peak value. The most effective way to provide protection is to substantially limit let-through-energy. This provides the following advantages:

- Far less damage at the location of the short circuit.
- Fast electric separation of a faulty unit from the system, especially power supplies connected in parallel that are switched off when the voltage of the power bus drops below a certain level.
- Far less wear on the miniature circuit breaker itself. This means more safe interruptions.
- Better protection of all components in the short circuit path.
- Far wider range of selective action when used with an upstream protective device. (No nuisance shut downs from feeder line interruptions, causing a blackout in all connected branches.)

## Ambient Temperature Derating

The Bulletin 1489-M circuit breakers are rated in RMS amperes at a 40 °C (104 °F) ambient temperature per UL 489/CSA C22.2 No. 5. This temperature is used as the ambient temperature external to an industrial enclosure. If a circuit breaker is applied in a temperature that exceeds the 40 °C (104 °F) ambient rating, then the circuit breaker should be derated using the table below. For IEC 60947-2 standard, the products carry an ambient rating of 30 °C. Follow standard IEC application considerations for temperature rating in different ambient temperatures.

**Note:** Application below 0° C is for non-condensing atmosphere. Care should be taken for applications below 0 °C. These devices are not certified to operate correctly in the presence of ice.

# Tripping Characteristics\*

## C Curve

## D Curve

\*DC trip curves:

When using 1489-M... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).

For C trip curve = 7.5 to 15 multiple of the rated current ( $I/I_n$ ).

For D trip curve = 15 to 30 multiple of the rated current ( $I/I_n$ ).

The thermal trip times remain the same for both AC and DC applications.

★ A maximum of two auxiliary contacts **OR** one signal contact and one auxiliary contact may be installed with or without one shunt trip per 1489-M. If a shunt trip is not used, two signal contacts may be installed per 1489-M.

‡ A maximum of three accessories may be installed per 1489-M. The shunt trip must be mounted closest to the 1489-M, then the signal contact, then the auxiliary contact(s). For allowed combinations, and installation instructions please contact your local Rockwell Automation sales office or Allen-Bradley distributor.

§ The shunt trips are allowed two wires per terminal (one wire per terminal slot). The signal and auxiliary contacts are allowed up to two wires per terminal.

# 1492-SP Supplementary Protectors

Bulletin 1492-SP thermal magnetic Supplementary Protectors provide overcurrent protection for equipment where branch circuit protection is already provided, or is not required. These devices are also Miniature Circuit Breakers as defined by IEC Standards.

These supplementary protectors are offered as a broad portfolio of pole variants, current ratings, and trip curves to match the appropriate level of protection for your application. They may be used with UL 508 Listed bus bars for convenience in panel assembly, a wide range of left-, right- and space saving bottom-mount accessories, and lock out attachments for safety during maintenance.

## Features

- Current limiting
- Fast breaking time
- Existing installations can be easily upgraded to include an auxiliary using the bottom mounted auxiliary contact options, which require no DIN Rail space
- 40 °C calibration temperature (UL/CSA) eliminates need to derate for 508A industrial control panel installations
- Installation of up to six accessories on the same circuit breaker
- Dual terminals provide a more secure connection of up to four wires, or two wires and a bus bar
- Superior shock and vibration resistance to prevent nuisance tripping
- Terminal design helps prevent wiring misses by directing wires into the terminal openings, even while tightening
- Reversible line and load connections
- Single and multi-pole toggle mount lock out attachments available for Lockout/Tagout (LOTO)
- RoHS compliant and fully-recyclable device
- Suitable for extreme ambient conditions

# Specifications

Electrical Ratings			
Poles	1, 2, 3, 1+N, 3+N		
Tripping characteristics	B, C, D		
Rated current ( $I_n$ )	0.5...63 A		
Rated frequency (f)	50/60 Hz		
Rated insulation voltage $U_i$ per IEC/EN 60664-1	250 V AC (phase to ground), 440V AC (phase to phase)		
Overvoltage category	III		
Pollution degree	3		
Data per UL/CSA			
Rated voltage	1-pole	AC	277V AC
		DC	48V DC
	2-pole	AC	480Y/277V AC
		DC	96V DC
	3-pole	AC	480Y/277V AC
	Rated interrupting capacity per UL 1077		$\leq 32$ A: 10 kA (AC); $> 32$ A: 5 kA (AC); 0.5...63 A: 10 kA (DC)
Application		Supplementary protector for general use; application codes: TC1: [1P] OLO 277V AC, [2P;3P] OLO 480Y/277V AC; SC: 10 kA (0.5...32 A), 5 kA (35...63 A), U2 480Y/277V AC; FW3	
Reference temperature for tripping characteristics		40 °C	
Electrical endurance		6,000 ops (AC), 6,000 ops. (DC) 1 cycle (1s - ON, 9s - OFF)	
Data per IEC/EN 60947-2			
Rated operational voltage ( $U_e$ )	1-pole, 1+N		230V AC
	2-pole, 3-pole, 3+N		400V AC
Highest supply or utilization voltage ( $U_{max}$ )	AC	1-pole, 1+N	253V AC
		2-pole, 3-pole, 3+N	440V AC
	DC★	1-pole	48V DC
		2-pole	96V DC
Min. operating voltage		12V AC, 12V DC	
Rated ultimate short-circuit breaking capacity ( $I_{CU}$ )		15 kA	
Rated service short-circuit breaking capacity ( $I_{CS}$ )		$\leq 40$ A: 11.25 kA $> 40$ A: 7.5 kA	
Rated impulse withstand voltage $U_{imp}$ . (1.2/50 $\mu$ s)		4 kV (test voltage 6.2kV at sea level, 5kV at 2,000m)	
Dielectric test voltage		2 kV (50/60Hz, 1 min.)	
Reference temperature for tripping characteristics		30 °C	
Electrical endurance		$I_n < 30$ A: 20,000 ops (AC) $I_n \geq 30$ A: 10,000 ops. (AC) 1 cycle (2s - ON, 13s - OFF, $I_n \leq 32$ A), 1 cycle (2s - ON, 28s - OFF, $I_n > 32$ A) 1,000 ops. (DC)	

★ IEC DC ratings self-declared.

♣ 2-pole/3-pole single pole load: TC2.

Mechanical Data		
Housing	Insulation group II, RAL 7035	
Indicator window	red ON/green OFF	
Protection degree per EN 60529	IP20, IP40 in enclosure with cover	
Mechanical endurance	20,000 operations	
Shock resistance per IEC/EN 60068-2-27	25 g - 2 shocks - 13 ms	
Vibration resistance per IEC/EN 60068-2-6	5g - 20 cycles at 5...150...5 Hz with load 0.8In	
Environmental		
Environmental conditions (damp heat) per IEC/EN 60068-2-30	28 cycles with 55°C/90-96% and 25°C/95-100%	
Ambient temperature $\Delta$	-25...+55 °C	
Storage temperature	-40...+70 °C	
Installation		
Terminal	Dual terminal	
Cross-section of wire $\blacklozenge$ – solid, stranded (front/back terminal slot)	35/35 mm <sup>2</sup> 18...4/18...10 AWG	
Cross-section of wire – flexible (front/back terminal slot)	25/10 mm <sup>2</sup>	
Multi-wire rating per UL, CSA	1 wire, 18...4 AWG 2-4 wires $\ddagger$ , 18...10 AWG	
Cross-section of bus bars (back terminal slot)	10 mm <sup>2</sup>	
Tightening torque	IEC	2.8 N•m
	UL/CSA	AWG 18...16: 13.3 in•lb. AWG 14...10: 17.7 in•lb. AWG 8...4: 39.8 in•lb.
Screwdriver	No. 2 Pozidrive	
Mounting	DIN rail (EN 60715, 35mm) with fast clip	
Mounting position	Any	
Supply	Optional	
Approximate Dimensions and Weight		
Pole dimension (H x D x W)	88 x 69 x 17.5 mm	
Pole weight	115 g (4.1 oz.)	
Combination with Auxiliary Elements		
Auxiliary contact	Yes	
Signal contact	Yes	
Shunt trip	Yes	

♠ 35mm<sup>2</sup> self-declared, not included in IEC/EN approval. $\Delta$  Refer to the ambient temperature derating tables. $\ddagger$  Wires must be of like size and stranding. Up to two wires per terminal slot.

### Power Loss Due to Current

Rated Current [A]	Power Loss Per Pole [W]	Rated Current [A]	Power Loss Per Pole [W]
0.5	1.4	13	2.3
1	1.4	15	2.4
2	1.8	16	2.5
3	1.6	20	2.5
4	1.8	25	3.2
5	1.9	30	3.5
6	2.0	32	3.7
7	1.1	40	4.5
8	1.5	50	4.5
10	2.1	63	5.4

### Zero-stack Derating

The installation of several miniature circuit breaker side by side with rated current on all poles requires a correction factor to the rated current (not required if spacers are used).

No. of Adjacent Devices	Factor
1	1
2,3	0.9
4,5	0.8
≥ 6	0.75

### Approximate Dimensions

**Note:** Dimensions are shown in millimeters (inches). Dimensions are not intended for manufacturing purposes.

**1-Pole**

**1-Pole**

**1 Pole + N, 2-, 3-, 3 Pole + N**

**1 Pole + N, 2-Pole**

**3-Pole**

**3-Pole + N**

## Ambient Temperature Derating

**Note:** Application below 0° C is for non-condensing atmosphere. Care should be taken for applications below 0 °C. These devices are not certified to operate correctly in the presence of ice.

Bulletin 1492-SP

# Tripping Characteristics\*

## B Curve

\* DC trip curves:

When using 1492-SPM... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).

For B trip curve = 4.5 to 7.5 multiple of the rated current ( $I/I_n$ ).

The thermal trip times remain the same for both AC and DC applications.

## B and C Curve - 230/400V AC Let-through Energy

# Tripping Characteristics\*

## C Curve

\* DC trip curves:

When using 1492-SPM... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).

For C trip curve = 7.5 to 15 multiple of the rated current ( $I/I_n$ ).

The thermal trip times remain the same for both AC and DC applications.

## B and C Curve - 230/400V AC Let-through Energy

# Tripping Characteristics\*

## D Curve

\* DC trip curves:  
 When using 1492-SPM... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).  
 For D trip curve = 15 to 30 multiple of the rated current ( $I/I_n$ ).  
 The thermal trip times remain the same for both AC and DC applications.

## D Curve - 230/400V AC Let-through Energy

‡ A maximum of one C.O. type signal contact, and two C.O. type auxiliary contacts **OR** three C.O. type auxiliary contacts may be installed with or without one shunt trip per 1492-SP.

★ A maximum of two 189-AR11, -AR02, or -AR20 auxiliary contacts may be installed per 1492-SP. They may not be combined with shunt trips or C.O. type contacts.

△ A maximum of four right mount accessories of any type may be installed per 1492-SP. The shunt trip must be mounted closest to 1492-SP, then the signal contact, then the auxiliary contact(s). For allowed combinations, and installation instructions please contact your local Rockwell Automation sales office or Allen-Bradley distributor.

# 1492-D Circuit Breakers

Bulletin 1492-D Miniature Circuit Breakers provide overcurrent and short circuit protection for higher voltage DC circuits. These devices are also Miniature Circuit Breakers as defined by IEC Standards.

These thermal magnetic breakers are offered in two pole variants and a wide range of current ratings to match the appropriate level of protection for your application. They may be used with UL 508 Listed bus bars for convenience in panel assembly, a wide range of left-, right- and space saving bottom-mount accessories, and lock out attachments for safety during maintenance.

## Features

- Specially designed for higher voltage DC circuits with a permanent magnet to direct the arc into the arc splitters
- Dual terminals provide a more secure connection of up to four wires, or two wires and a bus bar
- Existing installations can be easily upgraded to include an auxiliary using the bottom mounted auxiliary contact options, which require no DIN Rail space
- Installation of up to six accessories on the same circuit breaker
- Superior shock and vibration resistance to prevent nuisance tripping
- Terminal design helps prevent wiring misses by directing wires into the terminal openings, even while tightening
- Single and multi-pole toggle mount lock out attachments available for Lockout/Tagout (LOTO)
- RoHS compliant and fully-recyclable device

# Specifications

Electrical Ratings		
Poles	1, 2	
Tripping characteristics	C	
Rated current ( $I_n$ )	0.5...63 A	
Rated frequency (f)	0 Hz (DC only)	
Rated insulation voltage $U_i$ per IEC/EN 60664-1	250V AC (phase to ground), 440V AC (phase to phase)	
Overvoltage category	III	
Pollution degree	3	
Data per UL/CSA		
Rated voltage	1-pole	250V DC
	2-pole	500V DC
Rated interrupting capacity per UL 1077	10 kA	
Application	Supplementary Protector for DC application use; application codes: TC2, OLO, SC: U1, 250V dc, 10kA (1 pole); TC2, OLO, SC: U1, 500V dc, 10kA (2 pole)	
Reference temperature for tripping characteristics	25 °C	
Electrical endurance	6,000 ops	
Data per IEC/EN 60947-2		
Rated operational voltage ( $U_e$ )	1-pole	220V DC
	2-pole	440V DC
Highest supply or utilization voltage ( $U_{max}$ )	1-pole	250V DC
	2-pole	500V DC
Min. operating voltage	12V DC	
Rated ultimate short-circuit breaking capacity ( $I_{cu}$ )	10 kA	
Rated service short-circuit breaking capacity ( $I_{cs}$ )	10 kA	
Rated impulse withstand voltage $U_{imp}$ . (1.2/50 $\mu$ s)	4 kV (test voltage 6.2kV at sea level, 5kV at 2,000m)	
Dielectric test voltage	2 kV (50/60Hz, 1 min.)	
Reference temperature for tripping characteristics	55 °C	
Electrical endurance 1 cycle (2s - ON, 13s - OFF, $I_n \leq 32A$ ), 1 cycle (2s - ON, 28s - OFF, $I_n > 32A$ )	1,500 ops.	

Mechanical Data		
Housing	Insulation group II, RAL 7035	
Indicator window	red ON/green OFF	
Protection degree per EN 60529	IP20, IP40 in enclosure with cover	
Mechanical endurance	20,000 operations	
Shock resistance per IEC/EN 60068-2-27	25 g - 2 shocks - 13 ms	
Vibration resistance per IEC/EN 60068-2-6	5g - 20 cycles at 5...150...5 Hz with load 0.8In	
Environmental		
Environmental conditions (damp heat) per IEC/EN 60068-2-30	28 cycles with 55°C/90-96% and 25°C/95-100%	
Ambient temperature $\Delta$	-25...+55 °C	
Storage temperature	-40...+70 °C	
Installation		
Terminal	Dual terminal	
Cross-section of wire $\blacklozenge$ – solid, stranded (front/back terminal slot)	35/35 mm <sup>2</sup>	
	18...4/18...10 AWG	
Cross-section of wire – flexible (front/back terminal slot)	25/10 mm <sup>2</sup>	
	1 wire, 18...4 AWG 2-4 wires $\ddagger$ , 18...10 AWG	
Multi-wire rating per UL, CSA	10 mm <sup>2</sup>	
Cross-section of bus bars (back terminal slot)	IEC	2.8 N·m
	UL/CSA	AWG 18...16: 13.3 in·lb. AWG 14...10: 17.7 in·lb. AWG 8...4: 39.8 in·lb.
Tightening torque	No. 2 Pozidrive	
Screwdriver	DIN rail (EN 60715, 35mm) with fast clip	
Mounting	Any	
Mounting position	Note polarity of device	
Supply	Approximate Dimensions and Weight	
Pole dimension (H x D x W)	88 x 69 x 17.5 mm	
Pole weight	125 g (4.5 oz.)	
Combination with Auxiliary Elements		
Auxiliary contact	Yes	
Signal contact	Yes	
Shunt trip	Yes	

$\blacklozenge$  35mm<sup>2</sup> self-declared, not included in IEC/EN approval.

$\Delta$  Refer to the ambient temperature derating tables.

$\ddagger$  Wires must be of like size and stranding. Up to two wires per terminal slot.

**Power Loss Due to Current**

Rated Current [A]	Power Loss Per Pole [W]	Rated Current [A]	Power Loss Per Pole [W]
0.5	1.4	13	2.3
1	1.4	15	2.4
2	1.8	16	2.5
3	1.6	20	2.5
4	1.8	25	3.2

‡ A maximum of one C.O. type signal contact, and two C.O. type auxiliary contacts **OR** three C.O. type auxiliary contacts may be installed with or without one shunt trip per 1492-D.

★ A maximum of two 189-AR11, -AR02, or -AR20 auxiliary contacts may be installed per 1492-D. They may not be combined with shunt trips or C.O. type contacts.

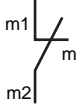

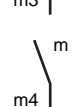

△ A maximum of four right mount accessories of any type may be installed per 1492-D. The shunt trip must be mounted closest to 1492-D, then the signal contact, then the auxiliary contact(s). For allowed combinations, and installation instructions please contact your local Rockwell Automation sales office or Allen-Bradley distributor.

# 188 Regional Circuit Breakers

Bulletin 188 thermal magnetic Circuit Breakers are protective devices applied at the equipment level. They are offered as a broad portfolio of pole variants, current ratings and trip curves to match the appropriate level of protection for your application. They may be used with IEC rated bus bars for convenience in panel assembly. A wide range of left-, right- and space saving bottom-mount accessories (common to the Bulletin 1492-SP devices) are available.

*Note: Bulletin 188 Regional Circuit Breakers have regional certifications only. They are available in China and Europe.*

## Features

- Current limiting
- Fast breaking time
- Broad portfolio of pole variants, current ratings and trip curves
- Available with 6 kA (188-K) and 10 kA (188-J) interrupting capacity
- Installation of up to six accessories on the same circuit breaker
- Existing installations can be easily upgraded to include an auxiliary using the bottom mounted auxiliary contact options
- Superior shock and vibration resistance to help prevent nuisance tripping
- Reversible line and load connections
- Single and multi-pole lock out attachments available for Lockout/Tagout (LOTO)
- RoHS compliant and fully recyclable device
- Suitable for extreme ambient conditions

### 188 Regional Circuit Breakers

<b>Rated Voltage</b>	IEC: $U_g$ 230/400V AC
<b>Interrupting Capacity</b>	IEC: 6 kA, 10 kA
<b>Current Ratings</b>	0.5...63 A
<b>Poles</b>	1, 2, 3, 4, 1+N, 3+N
<b>Trip Curves</b>	B, C, D
<b>Standards Compliance</b>	EN 60898-1 GB 10963
<b>Certifications</b>	CE Marked CCC Certified VDE Certified RoHS Compliant

## Catalog Number Explanation

**Note:** Examples given in this section are for reference purposes. This basic explanation should not be used for product selection; some combinations may not produce a valid catalog number.

4-pole

# Specifications

General Data			
Poles	1, 2, 3, 4, 1+N, 3+N		
Tripping characteristics	B, C, D		
Rated current ( $I_n$ )	0.5...63 A		
Rated frequency (f)	50/60 Hz		
Rated insulation voltage $U_i$ per IEC/EN 60664-1	250 V AC (phase to ground), 440V AC (phase to phase)		
Overvoltage category	III		
Pollution degree	2		
Data per IEC/EN 60898-1			
Rated operational voltage ( $U_e$ )	1-pole	230/400V AC	
	1-pole +N	230V AC	
	2-, 3-, 4-pole 3-pole +N	400V AC	
Highest supply or utilization voltage ( $U_{max}$ )	AC	1-pole	253/440V AC
		1-pole+N	253V AC
	DC★	2-, 3-, 4-, 3-pole+N	440V AC
		1-pole	48V DC
2-pole	96V DC		
Min. operating voltage	12V AC, 12V DC		
Rated short-circuit capacity ( $I_{cn}$ )	188-J	10 kA	
	188-K	6 kA	
Energy limiting class (B, C up to 40 A)	3		
Rated impulse withstand voltage $U_{imp}$ . (1.2/50µs)	4 kV (test voltage 6.2kV at sea level, 5kV at 2,000m)		
Dielectric test voltage	2 kV (50 / 60Hz, 1 min.)		
Reference temperature for tripping characteristics	B, C, D: 30°C		
Electrical endurance	$I_n < 30A$ : 20,000 ops (AC) $I_n \geq 30A$ : 10,000 ops. (AC); 1,000 ops. (DC);		

★ IEC DC ratings self-declared.

## Power Loss Due to Current

Rated Current [A]	Power Loss Per Pole [W]	Rated Current [A]	Power Loss Per Pole [W]
0.5	1.4	13	2.3
1	1.4	16	2.5
2	1.8	20	2.5
3	1.5	25	3.2
4	1.8	32	3.7
6	2.0	40	4.8
8	1.5	50	4.5
10	2.1	63	5.2

Mechanical Data	
Housing	Insulation group II, RAL 7035
Indicator window	None
Protection degree per EN 60529	IP20— IP40 in enclosure with cover
Mechanical endurance	20,000 operations
Shock resistance per IEC/EN 60068-2-27	25 g - 2 shocks - 13 ms
Vibration resistance per IEC/EN 60068-2-6	5g - 20 cycles at 5...150...5 Hz with load 0.8In

Environmental	
Environmental conditions (damp heat) per IEC/EN 60068-2-30	28 cycles with 55°C/90-96% and 25°C/95-100%
Ambient temperature ★	-25...+55°C
Storage temperature	-40...+70°C

Installation	
Terminal	Cage terminal
Cross-section of wire solid, stranded	0.75...25 mm <sup>2</sup>
Cross-section of wire flexible	0.75...16 mm <sup>2</sup>
Tightening torque	2.0 N·m
Screwdriver	No. 2 Pozidrive
Mounting	DIN Rail (EN 60715, 35mm) with fast clip
Mounting position	Any
Supply	Optional

Approximate Dimensions and Weight	
Pole dimensions (H x D x W)	85 x 69 x 17.5 mm
Pole weight	115 g (4.4 oz.)

Combination with aux. elements	
Auxiliary contact	Yes
Signal contact	Yes
Shunt trip	Yes

★ Refer to the Ambient Temperature Derating tables.

## Zero-stack Derating

The installation of several miniature circuit breaker side by side with rated current on all poles requires a correction factor to the rated current (not required if spacers are used).

No. of Adjacent Devices	Factor
1	1
2,3	0.9
4,5	0.8
≥ 6	0.75

## Approximate Dimensions

**Note:** Dimensions are shown in millimeters (inches). Dimensions are not intended for manufacturing purposes.

**1-Pole**

**1-Pole**

**1+N, 2-, 3-, 3+N, 4-Pole**

**1-Pole +N, 2-Pole**

**3-Pole**

**3-Pole +N, 4-Pole**

## Ambient Temperature Derating

**Note:** Application below 0° C is for non-condensing atmosphere. Care should be taken for applications below 0 °C. These devices are not certified to operate correctly in the presence of ice.

Bulletin 188-J, -K  
 Temperature Derating, IEC  
 Reference temperature = 30 °C

# Tripping Characteristics\*

## B Curve

\* DC trip curves:

When using 188-J/-K... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).

For B trip curve = 4.5 to 7.5 multiple of the rated current ( $I/I_n$ ).

The thermal trip times remain the same for both AC and DC applications.

## B and C Curve - 230/400V AC Let-through Energy

# Tripping Characteristics\*

## C Curve

\* DC trip curves:

When using 188-J/-K... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).

For C trip curve = 7.5 to 15 multiple of the rated current ( $I/I_n$ ).

The thermal trip times remain the same for both AC and DC applications.

## B and C Curve - 230/400V AC Let-through Energy

# Tripping Characteristics\*

## D Curve

\* DC trip curves:

When using 188-J/-K... on DC applications or DC loads, please refer to AC trip curves and times and use a factor of 1.5 for the magnetic instantaneous trip times the continuous current rating ( $I_n$ ).

For D trip curve = 15 to 30 multiple of the rated current ( $I/I_n$ ).

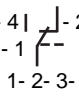

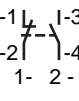

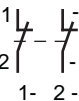

The thermal trip times remain the same for both AC and DC applications.

## D Curve - 230/400V AC Let-through Energy

# 1492-RCD Residual Current Devices

The Bulletin 1492-RCD line includes Residual Current Devices, also known as Residual Current Circuit Breakers, for detecting and interrupting leakage current to ground. By detecting small leakage currents and disconnecting all ungrounded connectors quickly, RCDs can prevent injury to exposed personnel and damage to equipment.

RCDs are used in series with miniature circuit breakers for additional circuit protection from not only overload and short circuit, but also ground fault. Many short circuits begin as undetected ground faults. Using an RCD in an application may detect problems before costly equipment damage and downtime occurs.

These devices are Type A Residual Current Devices to IEC Standards.

## Features

- Provides protection against current leakage to ground (earth) caused by an insulation loss between a live conductor and an exposed conductive part (such as an abraded wire, or a grounded person touching the live conductor)
- Suitable for protection against AC and pulsating DC (rectified AC) earth leakage current
- 30 mA sensitivity devices for personnel protection (consult local requirements)
- 100, 300 and 500 mA sensitivity devices for equipment protection
- Dual terminals allow a more secure connection of two wires, or both a wire and bus bar
- Reversible line and load connections

\* Catalog numbers with -US suffix are not EN or VDE certified.

## Specifications

General Data		
Poles	2,4	
Rated current $I_n$	25, 40, 63, 80 A	
Rated sensitivity $I_{\Delta n}$	2-pole	30, 100, 300 mA
	4-pole	30, 100, 300, 500 mA
Electrical Ratings		
Rated short-circuit strength	10 kA with 63 A gG/gL back-up fuse, 10 kA with 80 A gG/gL back-up fuse for 80 A device	
Rated operational voltage $U_e$ per IEC/EN	230/400V AC	
Rated voltage $U_e$ per UL	480Y/277V AC	
Max. operating voltage of circuit test	254V AC	
Min. operating voltage of circuit test	110V *	
Rated frequency	50/60 Hz	
Rated conditional short-circuit	10 kA (SCPD - fuse gG 100 A)	
Rated residual breaking capacity	1 kA	
Rated impulse withstand voltage $U_{imp}$ (1.2/50 $\mu$ s)	4 kV	
Dielectric test voltage at ind. freq. for 1 min.	2.5 kV	
Electrical endurance	10,000 operations	
Mechanical		
Indicator window	Red ON/green OFF	
Protection degree	Housing	IP4X
	Terminals	IP2X
Environmental		
Ambient temperature (with daily average +35 °C)	-25...+55 °C	
Storage temperature	-40...+70 °C	
Mechanical endurance	20,000 operations	
Installation		
Terminal type	Dual terminal	
Cross-section of wire - solid, stranded, flexible (front/back terminal slot)	25...63 A	25/25 mm <sup>2</sup>
		18...4 AWG
	80 A	35/35 mm <sup>2</sup>
		18...2 AWG
Cross-section of bus bars (front/back terminal slot)	25...63 A	10/10 mm <sup>2</sup>
	80 A	16/16 mm <sup>2</sup>
Tightening torque	25...63 A	2.8 N·m
		25 in·lb
	80 A	4.8 N·m
		43 in·lb
Mounting	DIN Rail EN 60715 (35 mm) with fast clip device	
Supply	Optional	

\*  $U_{t \min}$  = 170V for selected 30 mA sensitivity types as indicated in the product selection chart on page 87.

Approximate Dimensions and Weight		
Dimensions (H x D x W)	2-pole	88 x 67 x 35 mm
	4-pole	88 x 67 x 70 mm
Weight	2-pole	200 g (7.1 oz.)
	4-pole	350 g (12.3 oz.)
Combination with Auxiliary Elements		
Auxiliary contact	Yes	
Signal contact	Yes	

### Power Loss Due to Current

Rated Current [A]	Power Loss [W]	
	2-pole	4-pole
25	1	1.3
40	2.4	3.2
63	3.2	4.4
80	8.8	33.3

# 1692 Electronic Circuit Protectors

Bulletin 1692 Electronic Circuit Protection Modules protect the secondary circuits of 24V DC switched mode power supplies. These modules monitor both supply voltage and load currents, and you can monitor and control the modules both locally and remotely.

Designed for 24VDC circuits, the 1692 provides comprehensive protection against short circuit and overcurrent conditions while allowing for inrush current.

## Features

- Input voltage monitoring
- Current monitoring and limitations of the 4 outputs
- Fast tripping
- Select devices offer certified NEC Class 2 circuits

# 1492-MC Circuit Breakers

## 1492-MCA/MCB Circuit Breakers

Bulletin 1492-MC thermal magnetic Circuit Breakers are general-purpose devices suitable for branch circuit protection in industrial applications. They combine thermal and magnetic trip actions and provide accurate overload and short-circuit protection for conductors and connected equipment.

### Features

- Thermal-magnetic protection
- Available in 1/2" and 1" pole widths
- 10 kA interrupting capacity

## 1492-MCE/MCG Ground Fault Circuit Breakers

This line of ground fault sensing breakers are designed, manufactured and certified to North American and the equivalent CSA standards.

The 1492-MCE devices are Ground Fault Equipment Protectors (GFEPs) that protect from low-level fault currents. With a sensing threshold of 30 mA, these devices are suitable for equipment protection.

The 1492-MCG devices are Ground Fault Circuit Interrupters (GFCIs) that protect from low-level fault currents. With a sensing threshold of 5 mA, these devices are suitable for personnel protection.

The 1492-MCGA devices are Ground Fault Circuit Interrupters (GFCIs) with inherent self test capability as required by the UL 943 standard.

### Features

- UL 489 circuit breaker with GFCI (5 mA sensitivity) or GFEP (30 mA sensitivity)
- 10 kA interrupting capacity

### 1492-MC Circuit Breakers

<b>Rated Voltage</b>	120/240V AC, 240V AC

## Application Information

Selection of a Bul. 1492-MC circuit breaker with appropriate circuit protection includes consideration of:

- Circuit voltage
- Circuit frequency
- Available short circuit current
- Continuous current rating
- Application considerations
- Special operating conditions

The following discussion is based upon National Electric Code and UL requirements. Similar considerations are appropriate for Canadian applications.

### Circuit Voltage

Bul. 1492-MC circuit breakers are rated by voltage class. Applications should not exceed the listed voltage range (see Table 1).

### Circuit Frequency

Bul. 1492-MC circuit breakers may be applied to frequencies from DC up to 60 Hz without derating. For applications above 60...400 Hz, contact Rockwell Automation with specific application information for the derating of the circuit breakers.

### Available Short Circuit Current

Bul. 1492-MC circuit breakers should only be applied in those applications in which the available short-circuit (or fault) current is less than or equal to the interrupting rating shown in the Voltage and Interrupting Ratings table.

### Continuous Current Rating

Bul. 1492-MC circuit breakers are rated in RMS amperes at a 40 °C (104 °F) ambient temperature per UL 489 (CSA 22.2 No. 5.1). This temperature is the ambient temperature external to an industrial enclosure. If a circuit breaker is applied in a temperature that exceeds the 40 °C (104 °F) ambient, then the circuit breaker should be derated. Contact your local Rockwell Automation sales office or Allen-Bradley distributor for derating information.

### Application Considerations

The selection of a specific ampere rating for a specific application is dependent on the type of load and duty cycle and is governed by the National Electric Code (Canadian Electric Code) and UL/CSA. In general the codes require that overcurrent protection is at the current supply and at points where wire sizes are reduced. In addition the codes state that conductors be protected according to their current carrying capacity. There are specific situations that require application

consideration, such as motor circuit, and guidelines for the selection for transformer protection.

Bulletin 1492-MC circuit breakers are "non-100% rated" as defined by UL 489 Part 7.1.4.2. As such the circuit breaker's rating should be loaded to no more than 80%, if used with continuous loads.

### Branch Circuits:

Bulletin 1492-MC circuit breakers may be used to protect branch circuits. A branch circuit is the wiring portion of a system extending beyond the final overcurrent device protecting the circuit.

Guidelines established in NEC, CEC, UL, and CSA should be used to determine the specific device. The examples on page , also apply to the 1492-MC devices.

### Coordinated Overcurrent Protection

Where an orderly shutdown is required to minimize the hazards to personnel and equipment, a system of coordination based upon the faulted or overloaded circuit is isolated by selective operation of only the overcurrent protective device closest to the overcurrent condition.

The user should select devices that meet this requirement.

*References: NEC 240.12. Also see CEC.*

### Self Test Capability (GFCI only)

Per UL 943 (5.16 / 6.30), GFCI devices have built-in self test capability. The self test is an internal, automated function running in the background. For more information please refer to UL 943 standard.

# 1492-GH/-GS — Supplementary Protectors

Bulletin 1492-GH/GS high density miniature circuit breakers are thermal magnetic type supplementary protectors. These products are a high-density design often used when panel space (width) is a premium. Up to 24 one-pole breakers can be mounted per foot.

## Features

- Low current ratings and numerous rated currents for precise circuit requirements
- Can be ordered with auxiliary contacts that do not add any additional space
- AC and DC voltage ratings in one convenient device
- A positively trip-free mechanism (breaker operation cannot be defeated by holding the handle in the ON position)
- Superior shock and vibration resistance capabilities; to help prevent nuisance tripping

### 1492-GH Supplementary Protectors

Bulletin 1492-GH breakers are 1-pole devices. They use a push-to-set mechanism for circuit actuation and come with a manual trip button for manually opening the circuit.

### 1492-GS Supplementary Protectors

Bulletin 1492-GS breakers are available in 1-, 2-, and 3-pole devices. They use a toggle style handle mechanism for circuit actuation. These breakers may also be ordered with an internally mounted N.O. auxiliary contact that requires no additional mounting space.

## Application Information

### UL 1077, CSA C22.2 #235

In North America, miniature circuit breakers are recognized as supplementary protectors and are intended for use as overcurrent protection within an appliance or other electrical equipment where branch circuit protection is already provided or not required. Internationally, these products are rated to IEC standards as circuit breakers for equipment (CBE).

### Selection Information

High-density supplementary protector/miniature circuit breaker applications include, but are not limited to, the protection of test equipment, control instrumentation, solenoids, and power supplies. The wide range of current values and the use of a thermal magnetic trip system allows for a variety of applications where a very accurate and compact breaker is required.

To select a miniature circuit breaker, use the following procedure:

1. Determine the inrush correction factor from the following table.

Inrush Ratio	1:1 to 1:4	1:5	1:6	1:7	1:8
Factor	1.3	1.4	1.5	1.6	1.7

**Note:** For resistive loads use an inrush correction factor of 1.0.

2. Determine the temperature correction factor from the following table.

Ambient Temperature	70 °F (21.1 °C)	100 °F (37.8 °C)	120 °F (48.9 °C)	140 °F (60 °C)	160 °F (71.1 °C)	180 °F (82.2 °C)	200 °F (93.3 °C)
Factor	1.0	1.1	1.2	1.3	1.4	1.5	1.6

3. Determine the sealed current of the load being protected.
4. Multiply the sealed current by the two correction factors and select the closest higher ampere rating.

**Example** — For a solenoid with sealed current of 0.5 A, an inrush ratio of 1:8, and an ambient temperature of +110 °F, ( $0.5 \times 1.7 \times 1.15 = 0.9775$ ), select the 1.0 A miniature circuit breaker. Tripping time of the miniature circuit breaker is determined from the table below. Divide the miniature circuit breaker value by the temperature correction factor from the Ambient Temperature Correction Table to determine the actual rated current referenced in the table below.

Percent Rated Current	100%	200%	300%	400%	500%	600%	1000%	2000% Greater
Tripping Times (Seconds)	No Trip	10...40	3...18	1.5...9	0.8...6	0.003...4	0.009...2	Max. 0.02

**Note:** When several breakers are rail mounted adjacent to each other, the no-trip current will be 80% of rated current at 70 °F (21.1 °C).

Using selection tables, select Bulletin 1492-GH/GS that allows full load current nearest without exceeding application current. Also, check that inrush current is less than trip range of 6...10  $I_n$ .

## Tripping Characteristics

Time Current Curve –1492-GH

Time Current Curve –1492-GS

**Note:** When several breakers are rail mounted adjacent to each other, the no-trip current will be 80% of rated current at 70 °F (21.1 °C).

# 1492-FB Fuse Holders

The 1492-FB fuse holder family is designed for use in many OEM applications, such as power supplies, equipment protection, primary and secondary control transformers, solenoids, lighting and heater loads, and drives.

Bulletin 1492-FB fuse holders provide a safe and convenient means for installation of Class CC, J, and Midget fuses. To support correct fuse type installation, the Class CC fuse holder is designed to reject a Midget fuse or international 10 x 38 mm fuse. The Class J fuse holder will reject all fuses other than a Class J fuse.

All Allen-Bradley Class CC, J, and Midget fuse holders are UL Listed and CSA Certified for branch circuit protection. They are excellent for wire protection, small motor loads, and group protection of small motor loads. The Midget fuse holder is also CE Marked for 10 x 38 mm IEC Midget fuses.

## Features

- Compact size requires less panel space than open-style fuse holders
- Handle isolates the fuse from top-wired power when installing or removing fuse
- Terminals are shipped in open position and ready for wiring
- Suitable for use in field wiring applications

★ All major fuse brands and current ranges have been evaluated for this fuse holder. Due to the heat they generate, the following fuses must be derated:

Mersen ATQR 1.25 / = 0.42 A max.

Mersen ATQR 1.40 / = 0.47 A max.

‡ 690V when used in IEC applications.

\* Bus bars do not fit on Class J fuse holders.

## Accessories

Description	Size	Pkg. Quantity	Cat. No.
Fuseholder Identification Slide-in Markers (blank marker squares slip into molded slot. 100 markers/card)	5 mm x 5 mm	5 cards	1492-MC5X5
	6 mm x 5 mm		1492-MC6X5

# Specifications

Product Type (n = number of poles)	M	CC	J30 *	J60 *
		1492-FBnM30 "B" 1492-FB1M30-D1 "B" 1492-FBnM30-L "B"	1492-FBnC30 "B" 1492-FB1C30-D1 "B" 1492-FBnC30-L "B"	1492-FBnJ30 "B" 1492-FBnJ30-L "B"
For Fuse Type:	Midget 13/32" x 1-1/2" (10 x 38 mm)	Class CC	Class J	
Maximum voltage AC/DC	600V, 690V( IEC)	600V	600V	
Maximum current	30 A, 32 A (IEC)	30 A	30 A	60 A
Maximum current withstand (UL/CSA)	Fuse dependent 50 kA max UL	200 kA sym	200 kA sym	
Operating temperature range	-4...+130 °F, -20...+55 °C			
Conductor material	Copper, stranded			
Conductor strip length	0.43 in. (11 mm)		0.79 in. (20 mm)	
Conductor range	1 wire per terminal	#18...4 AWG (0.75...25 mm <sup>2</sup> )	#18...1 AWG (0.75...50 mm <sup>2</sup> )	#14...1 AWG (2.5...50 mm <sup>2</sup> )
	2 wires ★ per terminal	#18...8 AWG (0.75...10 mm <sup>2</sup> )	#18...6 AWG (0.75...16 mm <sup>2</sup> )	#14...6 AWG (2.5...16 mm <sup>2</sup> )
Terminal tightening torque	#18...8 AWG: 22 lb•in #6...4 AWG: 26 lb•in 0.75...25 mm <sup>2</sup> : 2.5 N•m		35 lb•in (4 N•m)	

★ Both wires must be same size  
\* Bus bars do not fit on Class J fuse holders.

## Approximate Dimensions

**Note:** Dimensions are shown in inches (mm). Dimensions are not intended for manufacturing purposes.

Dimension		For Midget Fuse	For Class CC Fuse	For Class J Fuse	
		30 A	30 A	30 A	60 A
Height		3.19 in. (81 mm)	3.19 in. (81 mm)	4.65 in. (118 mm)	4.65 in. (118 mm)
Depth		2.51 in. (64 mm)	2.51 in. (64 mm)	2.76 in. (70 mm)	3.23 in. (82 mm)
Width	1-Pole	0.71 in. (18 mm)	0.71 in. (18 mm)	1.41 in. (36 mm)	1.57 in. (40 mm)
	2-Pole	1.41 in. (36 mm)	1.41 in. (36 mm)	2.83 in. (72 mm)	3.15 in. (80 mm)
	3-Pole	2.13 in. (54 mm)	2.13 in. (54 mm)	4.25 in. (108 mm)	4.72 in. (120 mm)

## Bus Bars

### 1492-FB Bus Bars\*

Description	Pins	Rated Current [A] ‡	Pkg. Qty.	Cat. No. ★
1-Phase	57	100 A	1	1492-A1B1
	57	80 A	1	1492-A1B8
2-Phase	56	100 A	1	1492-A2B1
	56	80 A	1	1492-A2B8
3-Phase	57	100 A	1	1492-A3B1
	57	80 A	1	1492-A3B8

★ cULus, UL508, EN 60947-1, CE Marked

‡ Refer to the diagrams below for Feeder Terminal & Bus Bar Current Distribution

\* Bus bars do not fit on Class J fuse holders.

### 1492-FB Bus Bar Accessories

Description	Pkg. Qty.	Cat. No. ★
Terminal Power Feed, 35 mm <sup>2</sup> , for 1-phase bus bar	10	1492-AAT1LP
Terminal Power Feed, 35 mm <sup>2</sup> , for 2- or 3-phase bus bar	10	1492-AAT1
Dedicated Power Feed, 50 mm <sup>2</sup>	10	1492-AAT2
End Cover for 1-phase bus bar	10	1492-A1E
End Cover for 2- or 3-phase bus bar	10	1492-AME
Protective Shroud for unused pins	10	1492-AAP

★ cULus, UL508, EN 60947-1, CE Marked
