

Regulatory Approvals

Allen-Bradley Terminal Block, Circuit Protection, and Interface Module products generally have been designed to meet the requirements of one or more regulatory bodies. Most products have also been tested per additional standards. The following is a listing of some of the regulatory bodies and standards which apply to Allen-Bradley terminal block products. See the particular product description for information on specific approvals and ratings.

 (Underwriters Laboratories) — Devices in this catalog with one of these ratings have been tested by Underwriters Laboratories and meet the requirements of one or more of the following United States Standards:

- UL 467 — Grounding and Bonding Equipment
 - UL 508 — Standard for Industrial Control Equipment
 - UL 512 — Standard for Fuseholders
 - UL 486E — Equipment Wiring Terminals for Use with Aluminum and/or Copper Conductors
 - UL 1059 — Standard for Terminal Blocks
 - UL 1077 — Standard for Supplementary Protectors
- Reference UL files E34648, E40735, E65138, E113724, E160646

 (Underwriters Laboratories) — Devices in this catalog with this rating have been tested by Underwriters Laboratories and meet the requirements of one or more of the following Canadian Standards:

- CSA 22.2 No. 14-M95 — Industrial Control Equipment
- CSA 22.2 No. 158 — Terminal Blocks

Reference UL file E40735

 (Canadian Standards Association) — Devices in this catalog with this rating have been tested by the Canadian Standards Association and meet the requirements of one or more of the following Canadian Standards:

- CSA 22.2 No. 14-M95 — Industrial Control Equipment
- CSA 22.2 No. 39 — Fuseholders
- CSA 22.2 No. 158 — Terminal Blocks
- CSA 22.2 No. 235 — Supplementary Protectors

Reference CSA files LR1234, LR14074, LR19766, LR37712, LR67896

 Terminal blocks, interface modules, and circuit protection devices listed in this catalog (with the exception of the 1492-15T, -25T, -EC85, -ED103, -WTC3E, -WTC3J, -WTC3K, and -WTC3T) meet the requirements of the Low Voltage Directive put forth by the European Union. Devices have been tested and comply with one or more of the following European Norms:

- EN 60934 — Circuit Breakers for Equipment
- EN 60947-1 — Low Voltage Switchgear and Controlgear: General Rules
- EN 60947-7-1 — Low Voltage Switchgear and Controlgear: Terminal Blocks for Copper Conductors
- EN 60947-7-2 — Low Voltage Switchgear and Controlgear: Protective Conductor Terminal Blocks for Copper Conductors

IEC (International Electrotechnical Commission) — Devices listed in this catalog with IEC ratings meet the requirements of one or more of the following standards:

- IEC 934 — Circuit Breakers for Equipment
- IEC 947-1 — Low Voltage Switchgear and Controlgear: General Rules
- IEC 947-7-1 — Low Voltage Switchgear and Controlgear, Part 7: Ancillary Equipment, Section 1: Terminal Blocks for Copper Conductors
- IEC 947-7-2 — Low Voltage Switchgear and Controlgear, Part 7: Ancillary Equipment, Section 2: Protective Conductor Terminal Blocks for Copper Conductors

EEx e II — Devices listed in this catalog with "EEx e II" ratings meet the following European Norms per DEMKO, an Approval Certification Body for the European Union:

- EN 50014 — Electrical Apparatus for Potentially Explosive Atmospheres — General Requirements
- EN 50019 — Electrical Apparatus for Potentially Explosive Atmospheres — Increased Safety "e"

Details exist in DEMKO Certificate Number 97D.122398U.

Ex e II — Devices listed in this catalog with an "Ex e II" rating meet the following Canadian Standards per Underwriters Laboratories:

- E79-0-95 — Electrical Apparatus for Explosive Atmospheres — Part 0 — General Requirements
- E79-7-95 — Electrical Apparatus for Explosive Atmospheres — Part 7 — Increased Safety "e"

These products are suitable for Class I, Zone 1 Hazardous Locations. Reference UL file E187022

AEx e II — Devices listed in this catalog with an "AEx e II" rating meet the following United States Standard per Underwriters Laboratories:

- UL 2279 — Standard for Electrical Equipment for Use in Class I, Zone 0, 1, and 2 Hazardous (Classified) Locations
- These products are suitable for Class I, Zone 1 Hazardous Locations. Reference UL file E187022

Lloyd's Register — Many 1492-W, 1492-H, and 1492-R terminal blocks in this catalog have been approved for use in marine, off-shore, and industrial installations per the following standard:

- Lloyd's Register Test Specification No. 1:1996

Contact your local Allen-Bradley Sales Office for a copy of the certificate.

IEC Terminal Blocks

The Allen-Bradley Line of IEC Terminal Blocks... International Products for a Worldwide Marketplace

Allen-Bradley's Bulletin 1492-W line of internationally approved IEC style terminal blocks offers a wide range of features and benefits ideally suited for many industrial applications. The 1492-W line has been designed to meet the tough requirements of almost every industrial application. Functional, internationally approved, finger-safe, and cost-effective — the Allen-Bradley 1492-W line.

Products Available in the 1492-W Line

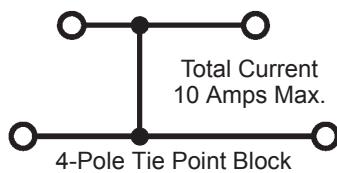

Our family of IEC terminal blocks consists of many different types of blocks, from general feed-through terminal blocks for control wiring to specialty blocks for grounding and isolating. We even offer thermocouple terminal blocks, specifically designed for temperature-dependent process control applications.

Products offered within the 1492-W line include:

- **Feed-Through Blocks**, capable of accommodating #22...3/0 AWG (0.5...70 mm²) wire
- **Grounding Blocks** for connecting a given circuit to a ground
- **Mini Blocks** for applications where panel space is at a premium
- **Two-Level Blocks** that double circuit wiring density
- **Multi-Conductor Blocks** that allow splitting or joining of control circuits
- **Three-Level Sensor Blocks** for coordination of three-wire sensor groups
- **Isolation Blocks** for circuit isolation during testing and troubleshooting
- **Fuse Blocks**, with and without blown fuse indication, for easily integrated overcurrent protection
- **Electrical Component Blocks** that allow the insertion of fixed components into control circuits. Available components include resistors, diodes, surge suppression circuits, and shunt bars.

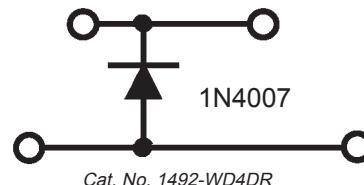

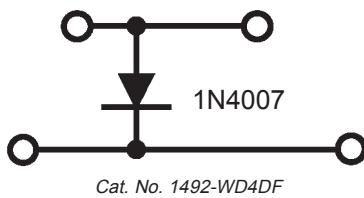

Tie-Point Block
(Cat. No. 1492-WD4C)

Incorporates a shunt bar between the upper and lower current bars to provide a common point among all four terminals.

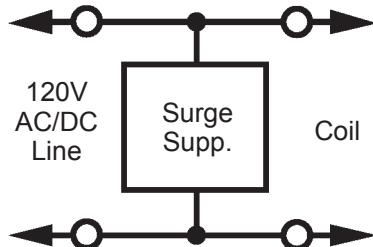

Diode Block
(Cat. Nos. 1492-WD4DF, 1492-WD4DR)

Uses a 1N4007 diode between the upper and lower levels for insertion into a control circuit. This block is useful in low voltage DC control circuits for directioning and suppression.

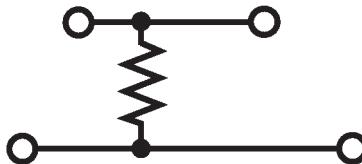

Surge Suppression Block
(Cat. No. 1492-WD4SS)

Provides a convenient means of incorporating transient suppression for relays, contactors, and solenoids into a control system.

Resistor Block
(Cat. No. 1492-WD4R)

Permits the introduction of a 1 Ω...100 MΩ resistor into a control circuit.

- **Return Blocks** that have both terminations on the same side of the terminal block allowing the rail to be mounted next to the wall of an enclosure
- **Plug-In Style Blocks** that allow the insertion of removable plugs into control circuits. Available plugs include a Disconnect Plug, a Fuse Plug, and a Component Plug which accommodate various electrical components.
- **Installation Blocks** for space-saving distribution of phase, neutral, and ground conductors in single-phase circuits
- **Thermocouple Terminal Blocks** (Types E, J, K, T) for temperature control applications
- A wide variety of **Snap-In Markers** for individual or group circuit identification
- Multi-pole insulated **Center Jumpers** which provide a convenient method of commoning control circuits

Materials and Design Features

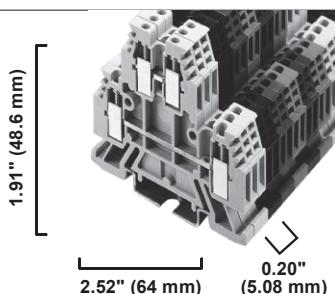

The 1492-W line is specially designed for safety, installation ease, and ruggedness. Features using these design criteria include the following:

- Nickel-plated terminals and stainless steel screws for superior corrosion resistance
- High copper content copper-alloy for excellent conductivity
- Four-sided wire funnel guides for easy wire insertion
- Finger-safe housings to prevent accidental contact with live circuits
- International approvals for worldwide use
- DIN Rail (199-DR1) mountability allowing terminal blocks to be placed on the same channel as contactors, starters, relays, and other DIN Rail-mounted control devices
- Self-extinguishing, polyamide 6.6 housing material with UL 94-V2 flammability rating
- Backed out screws for fast wiring
- CE mark for use in the European Union

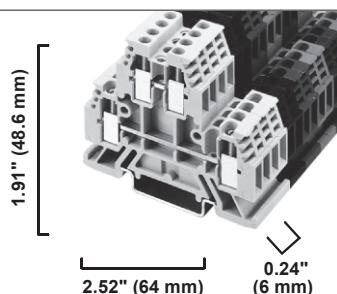

1492-WD3

Dimensions are not intended to be used for manufacturing purposes.

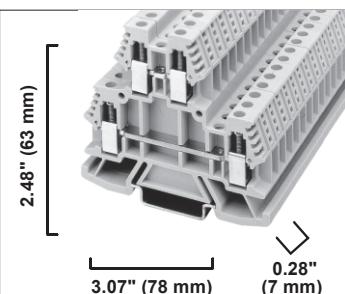

Note: Height dimension is measured from top of rail to top of terminal block.

1492-WD4

1492-WD6
